Configuring SSH Remote Access on Ubuntu Server

Objective

Set up an Ubuntu Server with SSH (Secure Shell) remote access and connect to it from a host desktop machine using Bridged Network mode.

Operating System Installation

Install Ubuntu Server

1. Start the VM and boot from the Ubuntu Server ISO
2. Follow the installation wizard:
    - Profile setup: Create a user account (e.g., server / server123)
    - Install OpenSSH server: **Check this option** (Important!)
    - Selected software: **None** (Standard Ubuntu Server)
3. Wait for installation to complete and reboot

Network Configuration

Configure Network Mode

For VirtualBox:

1. Power off the VM (if running)
2. Go to **Settings** → **Network**
3. **Adapter 1**: Enable Network Adapter
4. **Attached to**: Select **Bridged Adapter**
5. **Name**: Select your host's physical network adapter (Wi-Fi/Ethernet)
6. Click **OK**

For VMware:

1. Power off the VM
2. Go to **VM Settings** → **Network Adapter**
3. Select **Bridged** mode

4. Click **OK**

Install/Verify SSH Server

Server: Install SSH on the server (if not already installed):

- sudo systemctl status ssh – for checking the SSH status.
- sudo apt update – updating the your server.
- sudo apt install openssh-server -y –installing the SHH.
- sudo systemctl enable ssh – enabling the SSH to your unit. (SERVER/DESKTOP)
- sudo systemctlstartssh – starting the SHH to your unit. (SERVER/DESKTOP)

Bridged makes the server behave like a separate PC in your LAN.

1. Find the Server's IP

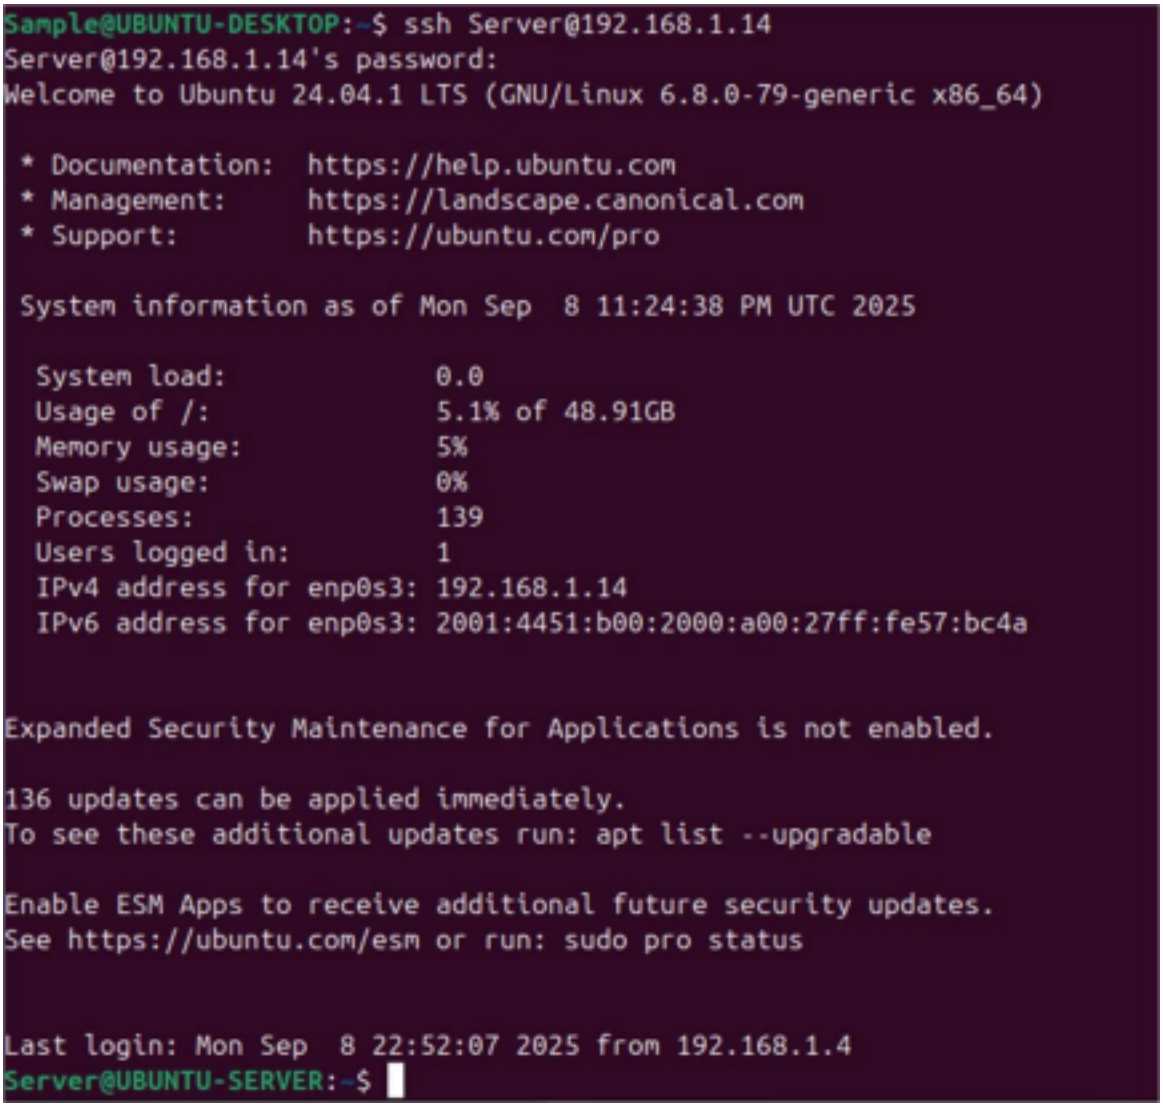

Inside the VM, run:

```
Sample@UBUNTU-DESKTOP:~$ ip a
1: lo: <LOOPBACK,UP,LOWER_UP> mtu 65536 qdisc noqueue state UNKNOWN group defaul

From the desktop, connect to the server: ssh username@192.168.1.120

2. Connect from Desktop

From your host desktop:

Submission Requirements

1. **Screenshots (labeled clearly):**
   - VM network settings showing Bridged Adapter
   - Server IP address (output of ip a or hostname -I)
   - SSH service status (sudo systemctl status ssh)
   - Successful SSH connection from host
   - Verification commands executed inside VM

2. **Submission Format:**
   - Single PDF file
   - Include name, student ID, and date
   - All screenshots with brief explanation
   - Upload to your portfolio website.
